

Four steps to a high school equivalency credential with the *HiSET*[®] exam

- 1. Find out if you are eligible** — Get started by seeing if you are eligible to receive a high school equivalency credential in your state. Each state has its own rules, and some states or jurisdictions require you to be a minimum age or resident of that state, or to take a preparation course. Visit hiset.ets.org/requirements/state for more information.
- 2. Sign up for your free My HiSET[®] account** — Find a local adult education program or test center near you, schedule appointments, view scores, access free resources and manage your test-taking experience. Register at hiset.ets.org/myhiset.
- 3. Prepare for the test** — There are many ways to prepare for the HiSET exam. Some people, such as those who have recently left high school in their junior or senior year with a good academic record, can prepare with a test prep book. But most people need to take courses at an adult education center. Check out the various ways to prepare at hiset.ets.org/prepare/materials.
- 4. Take the test and get your results** — Your scores will be available on your personal My HiSET account within approximately one week of testing. A passing score will be sent automatically to your state, which will send you your equivalency credential. Explore what happens after testing at hiset.ets.org/after/overview.
